

Overview of extranet module

Extranet let users outside the organization access shared information. It is dependent on project and address book modules

Extranet

Extranet are pages accessible by external users where they can access project information.

Prerequisite:

External users must be registered with a valid email address in the system as any other user.

Each external user selected must be assigned a specific role reserved for extranet.

Create first a role for your external users (go to 'admin/people/roles/add'. You can choose any role name: for exemple 'extranet'

[Home](#) » [Administration](#) » [People](#) » [Roles](#)

Role name *

extranet

Machine name: extranet [\[Edit\]](#)

The name for this role. Example: "Moderator", "Editorial board", "Site architect".

Save

Give permission to new role in /admin/people/permissions

EXTRANET

ek_extranet

Administrate extranet

Pull data from extranet

Push data to extranet

View content

Extranet

Settings

In the menu, click 'Extranet' for initial settings

You have 3 tabs to access settings.
Global settings will set access of information

Global settings | User mapping | New page | Current page

Home » Administration

extranet

Role assigned to extranet user. To create a role, got to [add](#)

CONTENT VIEW

- Display data from projects general description
- Display data from projects tasks
- Display files from projects communication
- Display files from projects logistics
- Display files from projects finance

ACTION

- Send notification to users
- Allow file delete by user

Record

In global settings, select the role assigned to extranet users (role must be created first) and select what type of information will be accessible

select sections visible by users

Allow update notifications and/or file deletion by external user

Global settings | User mapping | New page

Home » Administration » Extranet

Juice & co user (user@xxx.com)

Alpha et Omega user2 (user2@zzz.com)

Record

In mapping, you can link external users accounts with address book entry for easier access management

Extranet

New page

Once all settings are done, you can create a new page.

Global settings User mapping **New page**

Home » Administration » Extranet

Project *
312 | awarded | A-CA-6_09-BP | etest 3...

Short description *
new extranet page description

No access

- user -

Allowed

- user2 - Alpha et Omega

Create

In the "New page" tab, select the project that is referring to the extranet page

Add a short description useful for external users

Choose the external users (with appropriate role) that will have access to this page. Users with roles other than extranet role are not listed. Mapping with address book is useful to select proper user.

Note: user should also be granted access to the country of the project

When a page is already created, the link change to 'Edit extranet page' to change its settings

Extranet

Edit settings

The screenshot displays the 'extranet' settings page. At the top, there is a status dropdown menu currently set to 'on'. Below this, two columns are visible: 'No access' and 'Allowed'. The 'No access' column contains a single user entry 'user -'. The 'Allowed' column contains a user entry 'user2 - Alpha et Omega'. A double-headed arrow between the columns indicates that users can be moved between these two categories. A 'Communication' tab is visible at the bottom of the interface.

In edit settings, you can change the page status to On or Off. Off pages are not visible anymore to extranet users but still exist.

You can also change to users with access privilege in the list.

Note: user should also be granted access to the country of the project

Extranet

Share data

Data is not automatically shared on the extranet page.

It must be selected from the project page

Currently uploaded documents can be pushed to extranet content.

Attachments					Extranet
test.txt					
fast.jpg					

This document is now shared on the extranet page.
User will receive a notification
Click on **[button]** to **pull back** the file from the extranet page

Project

A document has been shared with you:

[drupal.jpg](#)

January 19, 2017, 9:14 am

This document is not displayed on the extranet page.
Click on **[button]** to **push** the file to the extranet page

Extranet

Users

If option for sending notification has been selected in global settings, the users selected will receive an email with a link to the new page when page is created

User will also receive a notification when a document is shared via extranet

[https://your_domain.com/extranet?id=\[project_serial\]](https://your_domain.com/extranet?id=[project_serial])

Access to the page via the link where 'project_serial' is the ref of the project linked to the page

Available pages

If the user has access to multiple pages, simply going to https://your_domain.com/extranet will list available page

A-SG-5_12-BP-320 - Blue bridge to island

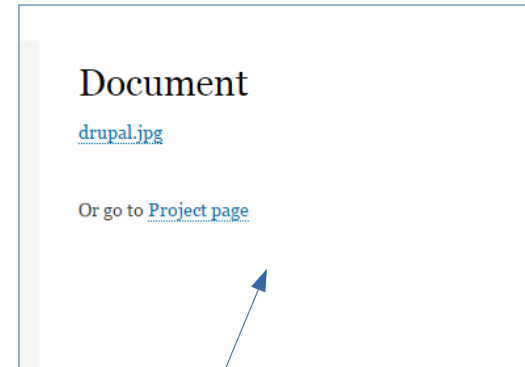

A-CA-6_09-BP-311_sub1 - Acme cleaning

The description is the one recorded during page creation

Click on the selected project to view the page

Extranet

Extranet

You can share some files with a single download link for the recipient.

Recipients must be recorded in address book and DO NOT need to have login and password.

Once sent the download will expire:
- after the recipient has downloaded the document;
- after a certain time (i.e. 24H)

The screenshot shows the 'Extranet - file share' interface. At the top, there is a navigation bar with a star icon and a tab labeled 'Open tab'. Below this is a menu with options: 'Global settings', 'User mapping', 'New page', 'Current pages', 'Extranet share files', and 'Extranet share files'. The 'Extranet share files' option is highlighted with a yellow box and an arrow pointing to it.

Below the menu, there is a breadcrumb trail: 'Home » Administration'. A warning message in a yellow box states: 'This form will generate share links for document(s). Each link is sent by email to selected addresses. The download link can only be used once by recipient.' Below this is a search input field containing 'pr', with a yellow box labeled 'Use box to search document' and an arrow pointing to it.

Under the search field, it says 'Document(s) found (click to select)'. A search result is shown: 'provence-honey-logo.jpg [A-CA-6_09-BP-311] - Project design and supply', with a yellow box labeled 'Search result (click on document to select)' and an arrow pointing to it.

Below the search result, it says 'Document(s) selected (click to remove)'. A document is selected and highlighted in blue: 'Proposal darft 1 client.odt [MVL-A-SG-2015_08-AO-20] - My new project', with a yellow box labeled 'Selected document(s) to share' and an arrow pointing to it.

At the bottom, there is a 'Destination' field containing 'john.foo@alphanomega.net,' with a yellow box labeled 'Enter one or more email address to send and click "Subimt"' and an arrow pointing to it. A 'Submit' button is located below the destination field.

Extranet

The sender of the document(s) will receive a notification receipt once the recipient use the download form.

Alternatively, sending and reading action are recorded in the system log.

Note: this does not mean the file was read or opened.

Filtering options for system logs:

Type	Severity
access denied	Emergency
cron	Alert
ek_extranet	Critical
ek_projects	Error
mail	Warning
page not found	Notice
php	Info
swiftmailer	Debug

Buttons: Filter, Reset

Example of system logs
(/admin/reports/dblog)

TYPE	DATE	MESSAGE
ek_extranet	16:02	User admin has sent download link to admin@arrea.com
ek_extranet	16:24	User has downloaded document dog.jpg as one time...
ek_extranet	16:22	User has tried to downloaded document as one time...
