

Overview of mail processing utilities

Update project information with email

Based on **server configuration**, you may have option to automatically upload email and attached files to projects

Send to:
project@[mydomain]

With subject:

[project code] [,]
[section] [,]
[title]

Direct email to "project" on **your application domain** (for example "mydomain.com"). Email must be sent by registered user.

Email content will be saved as text file and any attachment from the email will be saved separately

Attachments

Lorem Ipsum is simply dummy text of the printing and typesetting industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only the centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).
