

online payment integration

ustrust 

This module integrate online payment service (Utrust) and allows collection of payments with cryptocurrencies for invoices issued with sales module.

Customer are invited to pay online via a payment link send with email.

To create and send the link via email, from invoices list select the invoice for payment then select “Print and share”.

Pay online with Utrust

Online payment link

Management solution by [EK](#)

January 17, 2021, 4:15 pm

The client is redirected to the payment service provider page where credit card data can be inserted.

Currently the service provider integrated with the application is Utrust.com

Client has a choice of payment currencies

The screenshot displays the Utrust payment interface. At the top, the Utrust logo is visible. Below it, a white box contains the text "Rates are locked for 15 minutes" and a circular timer icon showing "15'". To the right of this box is a "Cancel Order" button with a close icon. The main section is titled "Select the currency to pay" and lists four options:

Currency	Rate	Amount
Bitcoin	1 BTC = \$ 35874.44	0.00003 BTC
Ethereum	1 ETH = \$ 1234.35	0.00081 ETH
Utrust Token	1 UTK = \$ 0.230895	4.33097 UTK
Tether	1 USDT = \$ 0.99926	1.00074 USDT

Below the list, there is a note: "For faster payments, avoid using exchanges." and a link for "Our policies". On the right side of the interface, a purple box labeled "Demo store" shows a summary: "1x Invoice \$ 1" and "Total \$ 1.00".

The client needs a  
crypto-currency wallet  
to make payment

ETH wallet  
integrated in  
browser

Client select a  
payment in ETH

You are using the **sandbox** environment. It uses the **testnets**. Do not use real money!

The screenshot displays the Utrust interface. At the top, a warning banner states: "You are using the **sandbox** environment. It uses the **testnets**. Do not use real money!". The main interface is purple and features the Utrust logo and a status bar showing "1 ETH = \$ 1239.83" and a "13'" timer. A "Cancel Order" button is visible. The "Manual" payment method is selected, showing a "Copy address" field with the value "0xB3639F020f7109684E4A6cBF9caA41cBba7D65D" and a "Copy amount" field with "0.00081 ETH". A "Demo store" section shows an invoice for \$1 and a total of 0.00081 ETH (\$1.00). A "Send ETH" modal is open on the right, showing the "Ropsten Test Network" selected, the destination address "0xB363\_65D", and the amount "0 ETH". The modal also displays the asset "ETH" with a balance of "0.007679 ETH", and transaction details including a gas price of "46" and a gas limit of "21000".

After payment is processed and accepted, the client is redirected to the main application site and a confirmation email is sent for processing confirmation and success confirmation.
