

Projects management

Projects module is one of the essential module that manages and centralizes different data about business projects and collaborative work. For each business case you wish to follow-up on medium to long term you can open a project page. The page will keep track of information, documents and gather most of other modules data under a single project page:

- sales and finance;
- reports and communication;
- logistics.

From the project page, you can control information access and distribute tasks.

Projects module is dedicated at following up projects with information sharing and simple tasks management

From a project page you can track different information like status, reports, tasks or cost.

The main project page (/projects/project) will show the latest projects information from where you can search or create projects.

⚠ Project type 'category 1' cannot be deleted because it is used.

Create a new project

</projects/project/new>

Projects are classified by **category** and **country**.

User must have access to the country for which the project is created (see [access settings](#))

You can create sub project linked to a main project. i.e.

- when main project is **extended geographically** (multi countries)
- when main project is **renewed over time**
- when main project as **different clients or different suppliers**

If you do not want to give access by default for users, check **Access box** and **edit access** by user inside project

Side panel options:

1) When a project is part of multiple sub-projects, files can be moved within linked projects from side panel.

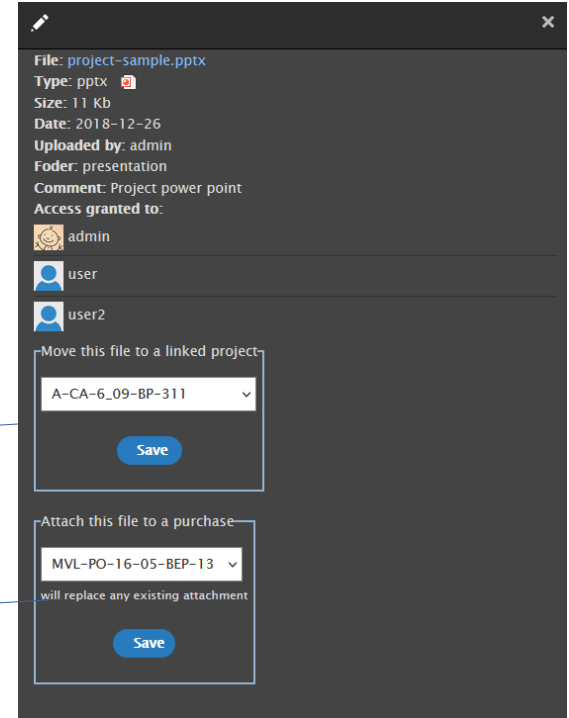

This may change the file access granted by user based on the target projects settings

2) with sales module installed, you may have option to attach a file to sales document (i.e. purchase)

Use selection form to move file between linked projects

Link a file to a purchase, i.e. an invoice. Purchase must be linked to the project first.

Attach files alternative

If **Documents module** is enabled, documents in your folders can be posted to a specific project.

(see Documents tutorial for further details)

Click to post to proeject

A screenshot of a 'project' dialog box. The dialog has a title bar 'project' with a close button. Inside, there is a text field 'drupal.jpg'. Below it is a section 'Project *' with a dropdown menu showing '320 | open | A-SG-5_12-BP | new go...'. Below the dropdown is a list with options: '- Select -', 'action plan', 'communication' (highlighted), and 'finance'. Below the list is a text field 'new logo for client'. At the bottom right is a 'Post' button. There are also two buttons at the bottom: 'Add optional comment' and 'Confirm'.

Comments

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum. You can define the template of project reference code by selecting elements display

I.e country code will be displayed as 3rd element

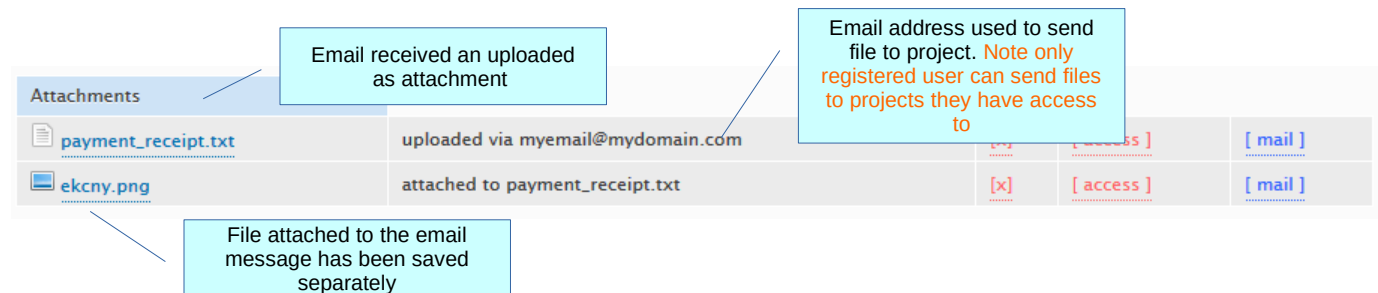

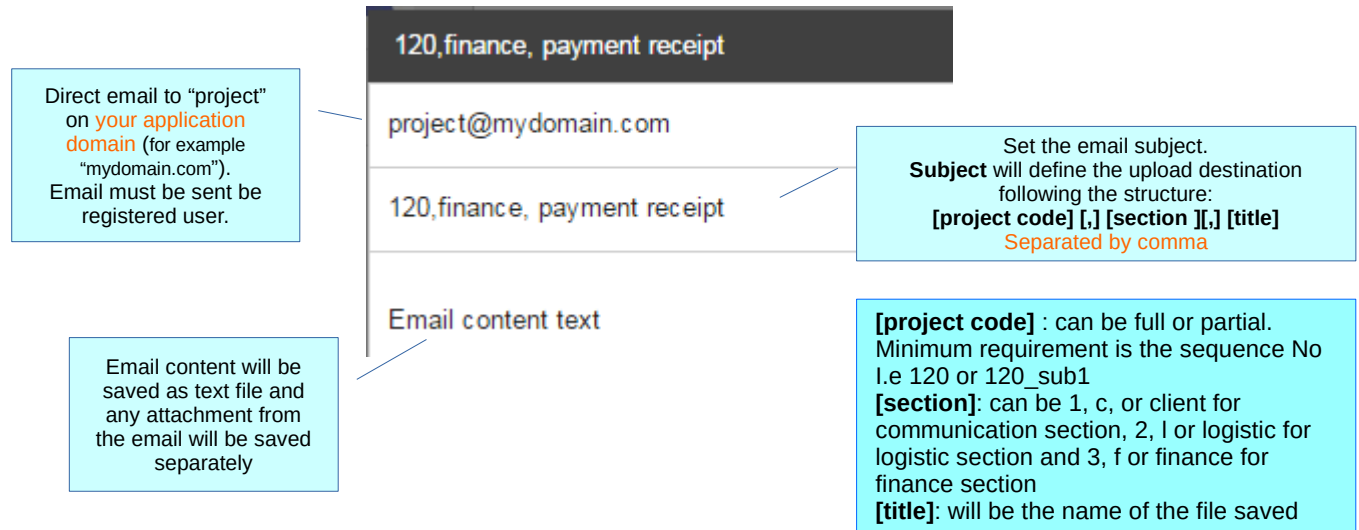

Sequence number cannot be changed

Set the increment base for sequence number count. I.e here next project will start at 101 if none have been created yet

Optional – upload file via email

Based on **server configuration**, you may have option to automatically upload email and attached files to projects

Access control to project pages definition

There are multiple levels of access control that can be applied

Each sub level restrict previous level

Level 1

Country access
Each user with access to a **country** will access project of that country by default

To control country access level go to :
[/ek_admin/access_country](#)

Level 2

Role access
Each user with a role that grant permission “**view project**” will see project page of their countries

To control roles access go to :
[/admin/people/permissions](#)

To change users roles go to :
[/admin/people](#) and edit users profiles

Level 3

Content access
Content view can be controlled by sections and users

To control section access by user go to :
[/projects/settings/users](#)

Level 4

Owner access
Each project can be restricted or granted by owner to other users.

To control section access by user go to a project page and click  **manage access**

Note: a user that do not have **level 1** access above may be granted single access here (country bypass) but **level 2 & 3** will still be applied

Access

You can view a summary of accesses per user

To view summary go to :
[/projects/settings/access_admin](#)
